

Schungite Guide

All information in our guide should not be understood as medical advice or a promise of healing.

| With passion and conviction for shungite

Natalia
and Sven
Strecker

Our passion for Shungite began in the 1990s – with a simple Shungite pyramid.

What started as a fascinating hobby quickly grew into a successful family business with satisfied customers all across Europe.

Today, we are excited to share our many years of experience and expertise in Shungite with you.

Natalia and Sven Strecker

Note: Despite our many years of experience with Shungite, we are not health professionals and cannot provide medical advice. Thank you for your understanding.

Shungite – directly from the source to your home

With this certificate, I, Sven Strecker, guarantee the quality and authenticity of our Shungite stones.

Shungite is much more than just a stone for many people. That's why we place the highest value on offering our customers only authentic and high-quality stones. Whether for radiation protection, water purification, or other applications – the origin and quality of the Shungite are crucial to us. Since the 1990s, we have been sourcing our stones directly and exclusively from the deposit in Karelia, Russia.

To ensure the quality of our products, we follow a clear control process:

Controls at the source

We guarantee the purity and authenticity of the Shungite through comprehensive on-site testing.

Quality checks in Würzburg

Before shipping, we check key characteristics such as conductivity, density, and optical properties.

Certificate

When purchasing our products, you will receive a certificate documenting our strict quality controls and guaranteeing the authenticity of our Shungite products. This ensures that you always receive high-quality and authentic products.

The deposit is located near the town of Shunga in Karelia.

Formation and Composition

Shungite is a unique form of carbon that originated around two billion years ago. There are two theories about its origin: The first theory suggests that Shungite is of extraterrestrial origin and arrived on Earth via a meteorite, as fullerene-like molecular structures of Shungite have also been detected in space.

The second theory posits that Shungite was formed through the transformation of organic materials, such as ancient algae. Despite extensive research, both theories remain controversial, further emphasizing the mystical nature of Shungite.

The origin plays a crucial role in the quality of Shungite. The highest-quality Shungite stones, with their unique chemical composition, come exclusively from Karelia, Russia. Although similar stones can be found in other places, they differ in structure and chemical composition, making Karelia's Shungite unique.

Shungite is often called a miraculous remedy.

Although it has some positive properties, it is neither a universal cure-all nor can it replace medical treatment.

Shielding and harmonization

The terms “shielding” and “harmonization” of radiation are often confused. Protective stones made of shungite – such as plates, jewelry, or pyramids – do harmonize the radiation, but it remains present and is not actually shielded. These and many other misunderstandings can lead to incorrect assessments of shungite’s properties. Be well informed before making decisions about shungite applications.

Fact: The unique composition and the special structure of the carbon molecules make shungite a valuable and extraordinary gift of nature. Because of

its properties, shungite is appreciated by many users in areas such as water treatment, radiation protection, and many other applications.

Shungite – a composite rock in its composition

- **Carbon:** Content varies between 30% and over 90%, with elite shungite having a significantly higher carbon content.
- **Minerals:** These include silicates, quartz, and pyrite, which influence its chemical properties.
- **Organic compounds:** These originate from the original organic materials and may possess antioxidant properties.

Application and Properties of Shungite

Shungite is used in various fields and is valued for its versatile properties.

Radiation Protection

Shungite protection objects offer effective protection against radiation not by blocking it, but by harmonizing it. They transform left-turning energy into right-turning energy, thereby reducing negative effects and easing the burden on the body. Whether through pyramids, wearable shungite stones, or jewelry – shungite makes radiation exposure significantly more tolerable. Building a shungite protection wall is also possible but requires considerable effort and cost.

Water

Water is essential for life and serves as an efficient carrier of information. Shungite transmits positive information and changes the energetic structure of the water, regardless of the type of shungite. As a result, the water is revitalized and contains positive energy, similar to natural spring water.

Balance

Keeping our inner energy in balance is crucial for well-being. Disturbances can have negative effects on health. The combination of shungite and talc chlorite balances Yin and Yang. We recommend using shungite on the left side of the body and talc chlorite on the right to harmonize energy flow and restore inner balance, which leads to increased energy and stamina.

Differences between Classic Shungite and Elite Shungite |

1. Appearance

Classic Shungite: Matte, rough surface with visible inclusions of pyrite and quartz.

Elite Shungite: Naturally shiny, barely visible inclusions, more homogeneous structure.

2. Staining

Classic Shungite: Stains heavily, especially when unpolished.

Elite Shungite: Hardly stains.

3. Carbon Content

Classic Shungite: Contains approx. 30–50% carbon.

Elite Shungite: Contains approx. 80–90% carbon.

4. Price

Classic Shungite: Found in almost unlimited quantities, which makes products from this material relatively inexpensive.

Elite Shungite: Rare in nature and therefore significantly more expensive.

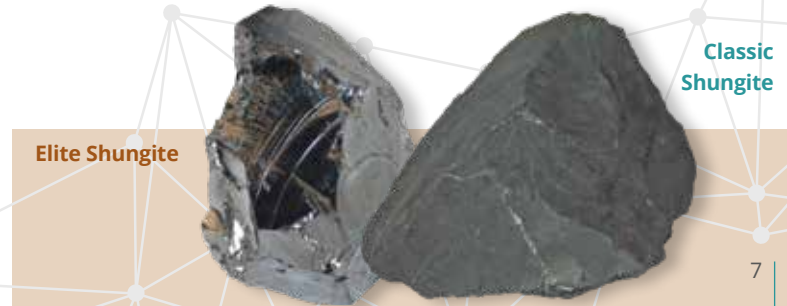

Both types of shungite have their advantages and disadvantages, without one being fundamentally better or worse.

Elite shungite is characterized by higher intensity but is difficult to process and is usually used in its natural form.

Classic shungite, on the other hand, is more versatile since it can be shaped into pyramids, spheres, or other forms.

There are many intermediate forms at the mining sites, which should be checked individually before use.

We do not offer elite shungite stones that have been modified with resin, as this significantly alters the natural structure.

Balance for Body, Mind and Soul

Everyday stress can weaken our life energy. Shungite helps harmonize Yin and Yang and protects our energetic body from external negative influences. In this way, a stable balance is created, and disruptive influences are repelled.

Use of Shungite and Talc Chlorite

Left side of the body (Yin): Shungite strengthens Yin energy and harmonizes the flow.

Right side of the body (Yang): Talc chlorite promotes Yang energy and supports balance.

Preparation and Application

Before use, switch off all electronic devices in the immediate vicinity. The application takes 10–15 minutes and can be done once or twice a day while sitting, lying down, or standing.

On the Go

Shungite and talc chlorite lenses and spheres are practical companions to maintain energetic balance anytime. Shungite on the left, talc chlorite on the right – for more energy and harmony. Regular use supports well-being and keeps the energetic body balanced and protected.

Elegant Jewelry for Strength and Harmony |

Shungite jewelry has been valued for centuries as a healing and protective stone, especially in Karelia, where it is used for well-being and protection. It repels negativity, attracts positivity, and can be enhanced with symbols such as zodiac signs or the Flower of Life.

Jewelry made of Elite Shungite: Elite Shungite is considered particularly intense and offers strong energetic protection. Combined with gold and silver, it is offered as high-quality jewelry that impresses with its presence.

Jewelry made of classic Shungite: This jewelry provides a gentler energy. Classic Shungite is easily shapeable and used in beads, pendants, or with symbols to highlight its energetic properties. Shungite jewelry forms an energetic connection with the wearer, enhances positive life energies, supports emotional and spiritual balance, and can stimulate healing processes.

Shungite Pendant

A shungite pendant is more than just jewelry: it reduces radiation exposure and strengthens the energy balance. With its deep black elegance, it suits any outfit and occasion.

Elite Shungite

Especially intense and set in gold or silver, as it is brittle in its raw form.

Classic Shungite

Versatile in shape and often engraved, ideal as an effective and affordable protective stone.

Symbols and Zodiac Signs – Energetic Enhancement

Shungite pendants with symbols or zodiac signs can amplify the energy and promote well-being. A pendant with your zodiac sign supports the harmony between your personality and the natural energy of shungite, strengthening the mind and soul.

Genuine shungite pendants are made from solid shungite and are crafted without pressed or molded materials, preserving the natural structure and original energy.

Choose the Right Size

- Children: 2–3 cm
- Adults: up to 5 cm, depending on body size

Our collection offers various sizes and shapes. Symbols and zodiac signs – energy enhancement. Symbols or zodiac signs on pendants enhance the energetic effect and promote well-being.

Find all the pendants online:

SKU: ARMXXP0218

Why Wear a Shungite Bracelet?

Shungite bracelets radiate positive energy, support emotionally and spiritually, and help ward off foreign energies. They do not require energetic cleansing, as shungite does not store negative energies.

The bracelets can be combined with healing stones such as jade or lapis lazuli for a special aura.

Clean with a dry cloth; slight discoloration is normal at first.

Finding the Perfect Bracelet: Measure your wrist and choose the appropriate size. Discover other shungite jewelry such as pendants and necklaces in our shop.

SKU: KTT10P0101

Shungite Necklaces – Stylish Protection for Your Neck

A shungite necklace connects protection and energy at a central point on the body – the neck, between the heart and head. Our necklaces, made in Germany, harmonize the energetic body and balance negative influences.

Shungite necklaces combine perfectly with minerals like malachite or jade. Complementary pieces such as shungite earrings and bracelets complete your jewelry ensemble harmoniously.

Well-being in Everyday Life

The necklaces promote protection, security, and energetic balance – a stylish way to feel the power of shungite.

Shungite – Harmonization for Your Electronic Devices

Shungite helps to harmonize the radiation from electronic devices and support the biofield without affecting the functionality of the devices. Even small shungite stones weighing about 10g are suitable for reducing electromagnetic influences. Self-adhesive shungite discs can be easily applied to mobile phones, tablets, or other devices.

Our recommendation: Smaller discs for mobile phones and cordless phones. Larger discs for computers and Wi-Fi devices.

All of our discs have a self-adhesive backing, allowing for easy and secure application.

Shungite for Smartphones

Many people carry their smartphones constantly, so it is important to harmonize the radiation from the device. A protective disc on the back of the smartphone can noticeably reduce radiation exposure. A disc with a diameter of 30mm is completely sufficient for this purpose.

Laptops and Wi-Fi Routers

These self-adhesive protective discs are slightly larger than those for smartphones but are made from the same high-quality shungite mineral. Attach the protective disc so that the stone does not cover the indicators or buttons to ensure the device functions correctly.

Protection on the Go – In the Car or in Your Pocket

If you don't wear jewelry, you can still benefit from the power of shungite on the go by carrying a stone on your keychain or in your car. It accompanies you with gentle, harmonizing energy.

A shungite amulet hanging from the rearview mirror balances the energy field inside the vehicle without interfering with its technology. It is suitable for electric vehicles as well as those with any type of drive system. Make sure the pendant does not obstruct your view or interfere with operation.

The shungite keychain is small but powerful. Since your keys are always with you, the stone regularly unfolds its energy. Engravings with zodiac signs or power symbols enhance the personal connection and offer individual protection.

A Loyal Companion

Whether in the car or on your keychain, shungite promotes energetic balance, protects against external energies, and gives a sense of security – a stylish accessory with harmonizing properties.

*Protective Amulet for the Car

Mats & Belts – For More Vitality

Shungite mats and belts support energetic balance and offer versatile uses. Filled with fine shungite granules, they can be flexibly applied to the back, knees, or other body areas that need relief or support.

Our mats and belts are designed without zippers or buttons and can be used both cooled and warmed.

Do not heat the products above 100°C and never use a microwave oven for this.

Heat and Cold Applications

Warm: Soothing heat relieves tension and alleviates pain.

Cold: Reduces swelling and inflammation.

Care

Belt and mat covers (without shungite element) are washable at 40°C. The shungite element is removable. Energetic cleansing is not necessary.

Shungite Mats

With durable cover and filled with 1.7 kg of shungite, available in two designs:

*Shungite Belt
Available in
three lengths
(each with
500 g of shungite):*

*Red (80 – 100 cm):

*Shungite Mat
with Karelian
"Energy" Pattern
SKU:
TEX44LY856*

Discover the many benefits of shungite and enhance your well-being – for a better quality of life.

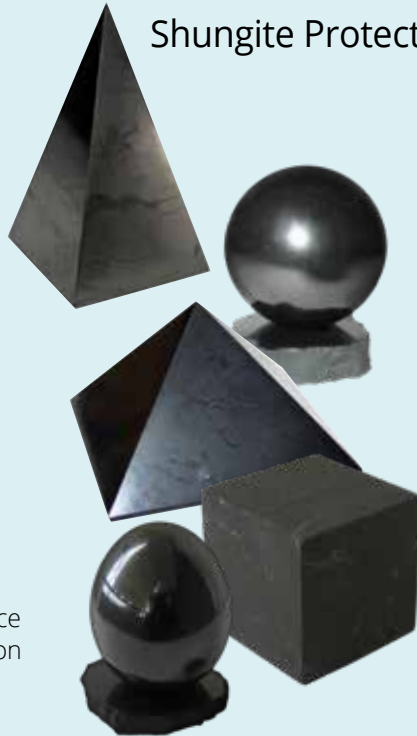

Shungite Protection Objects for Placement

Pyramids, spheres, cubes, and eggs made of shungite offer protection from electromog, geopathic stress zones (such as water veins), and external energies. Our selection includes only products made of genuine, untreated shungite. We do not carry items made from glued or pressed materials, as these lack the natural stone structure, which reduces their effectiveness.

Features and Variants

Genuine shungite shows natural minerals like pyrite and quartzite on its surface, which are more visible on matte finishes and less so on polished ones. The choice between polished and matte surfaces is a matter of preference and does not affect effectiveness. Matte surface products can also be used for water purification but tend to rub off more.

Shungite Pyramids: Harmonize the biofield and create a balanced atmosphere—ideal for the desk or living room. All pyramids in our range are designed according to the Golden Ratio.

Shungite Spheres: Promote calming energy and are perfect for bedrooms or relaxation areas.

Shungite Cubes: Symbolize stability and grounding, support energy flow, and foster inner balance.

All objects are made from the same natural stone and differ only in shape. The choice of form can help enhance protection and well-being in our surroundings.

In Living and Working Spaces

In the areas where we spend most of our day, it is essential to feel comfortable. To support this, shungite protection objects can help harmonize the environment and reduce exposure to radiation. They can also assist in neutralizing geopathic stress zones.

With shungite, you can create more balance and energy – at home and in the workplace.

Recommended shapes: For living and working spaces, pyramids and cubes are especially suitable, as these shapes are considered powerful energetic objects that enhance concentration and improve overall well-being.

Small or large? Several small objects are often more flexible and cost-effective than a single large central one. When strategically placed in areas where you spend the most time, they can often be more effective.

Optimal placement: Position the objects close to you to make the most of their effective range. Ideally, place them in areas where you spend a lot of time, such as your desk, living area, or kitchen. If possible, position them between yourself and the source of radiation – like a monitor or other electronic devices – to ensure maximum protection.

Pyramids and Cubes for More Protection and Vital Energy

The use of symbols is part of energetic information medicine and, in combination with shungite, enhances positive energy. Feng Shui symbols, traditionally used to harmonize rooms, additionally bring peace, happiness, and serenity into the home through their deeper meaning.

Shungite Pyramids

Our range includes **Classic (Cheops-type) pyramids** and **Tall (Golod-type) pyramids**. Both are crafted according to the “golden ratio” and consist of a solid piece of Shungite — without glue or any binding agents.

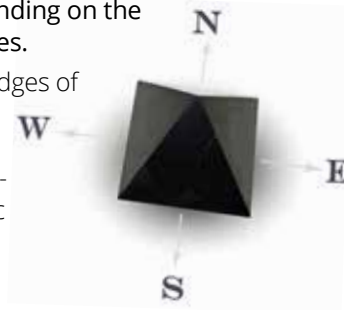

Stability and Grounding

The Shungite cube (hexahedron, cube) symbolically represents the element Earth and promotes grounding and stability. It is ideal for dissolving blockages and supporting a free flow of energy.

| <i>Pyramids, polished</i> | <i>SKU:</i> | <i>Radius</i> |
|---|-------------------|---------------|
| <i>Pyramid, edge length 50 mm</i> | <i>PYR05P3020</i> | <i>2–3 m</i> |
| <i>Pyramid, edge length 70 mm</i> | <i>PYR07P3021</i> | <i>3–4 m</i> |
| <i>Pyramid, edge length 100 mm</i> | <i>PYR10P3022</i> | <i>5–6 m</i> |
| <i>Pyramid, edge length 150 mm</i> | <i>PYR15P3023</i> | <i>6–7 m</i> |
| <i>Pyramids, matte</i> | <i>SKU:</i> | <i>Radius</i> |
| <i>Pyramid, edge length 50 mm</i> | <i>PYR05M3024</i> | <i>2–3 m</i> |
| <i>Pyramid, edge length 70 mm</i> | <i>PYR07M3025</i> | <i>3–4 m</i> |
| <i>Pyramid, edge length 100 mm</i> | <i>PYR10M3026</i> | <i>5–6 m</i> |
| <i>Pyramid, edge length 150 mm</i> | <i>PYR15M3027</i> | <i>6–7 m</i> |
| <i>Tall pyramids, polished</i> | <i>SKU:</i> | <i>Radius</i> |
| <i>Tall pyramid, edge length 50 mm</i> | <i>PYR05H3033</i> | <i>2–3 m</i> |
| <i>Tall pyramid, edge length 100 mm</i> | <i>PYR10H3034</i> | <i>5–6 m</i> |

The energetic radius of a Shungite pyramid varies depending on the length of its edges.

Note: Align the edges of the pyramid with the cardinal directions to optimize its energetic effect.

| <i>Cubes, polished</i> | <i>SKU:</i> | <i>Radius</i> |
|---------------------------------|-------------------|---------------|
| <i>Cube, edge length 50 mm</i> | <i>WUR05P4203</i> | <i>1–2 m</i> |
| <i>Cube, edge length 70 mm</i> | <i>WUR07P4204</i> | <i>2–3 m</i> |
| <i>Cube, edge length 100 mm</i> | <i>WUR10P4205</i> | <i>4–5 m</i> |
| <i>Cubes, matte</i> | <i>SKU:</i> | <i>Radius</i> |
| <i>Cube, edge length 50 mm</i> | <i>WUR05M4208</i> | <i>1–2 m</i> |
| <i>Cube, edge length 70 mm</i> | <i>WUR07M4209</i> | <i>2–3 m</i> |
| <i>Cube, edge length 100 mm</i> | <i>WUR10M4210</i> | <i>4–5 m</i> |

In the Bedroom and Resting Areas

In the bedroom, where rest and recovery are paramount, Shungite protection objects in gentle, rounded shapes such as spheres or eggs are particularly suitable. These forms promote a calm and balanced atmosphere and help ease the environment by reducing radiation exposure and neutralizing geopathic stress zones. Especially in a space dedicated

to regeneration, Shungite supports a soothing and revitalizing environment.

Placement of Protection Objects

To make optimal use of Shungite, place the protection object near you – for example, on your nightstand — but not closer than 20–30 cm.

A position at body height is ideal. Make sure you are within the protected area of the object. Spheres with a diameter of 5 to 7 cm are especially popular for the sleeping area, as they prove to be powerful yet discreet companions for a restful night.

Shungite Spheres and Eggs: Harmonious Shapes for Better Relaxation

Use and Protective Zones

Shungite spheres and eggs combine the natural properties of Shungite with harmonious shapes traditionally associated with balance and relaxation.

The sphere shape symbolizes perfection and unity and is often used to enhance the harmonizing abilities of Shungite. Especially in relaxation and sleeping areas, Shungite spheres promote a balanced room atmosphere and help reduce stress. Shungite eggs, with their drop-like shape, stand for growth and renewal. They are ideal for meditation or for targeted placement in specific areas to help resolve energetic blockages.

Other Applications

Thanks to their smooth, handy surface, Shungite spheres and eggs are often used for massages or as practical companions on the go to promote inner balance.

Matte or Polished – A Matter of Preference

Shungite spheres and eggs are available with either a matte or polished surface. Matte versions show more inclusions like pyrite and quartzite, leave more residue, and are suitable for water purification. Polished spheres and eggs leave little to no residue but are not suitable for water use. The surface does not affect the protective properties of the objects.

| <i>Sphere</i> | <i>SKU:</i> | <i>Radius</i> |
|-----------------------------------|-------------------|---------------|
| <i>Sphere, Ø 50 mm, polished</i> | <i>KUG05P5502</i> | <i>2–3 m</i> |
| <i>Sphere, Ø 70 mm, polished</i> | <i>KUG07P5503</i> | <i>3–4 m</i> |
| <i>Sphere, Ø 100 mm, polished</i> | <i>KUG10P5504</i> | <i>5–6 m</i> |
| <i>Sphere, Ø 150 mm, polished</i> | <i>KUG15P5505</i> | <i>6–7 m</i> |
| <i>Sphere</i> | <i>SKU:</i> | <i>Radius</i> |
| <i>Sphere, Ø 50 mm, matte</i> | <i>KUG05M5506</i> | <i>2–3 m</i> |
| <i>Sphere, Ø 70 mm, matte</i> | <i>KUG07M5507</i> | <i>3–4 m</i> |
| <i>Sphere, Ø 100 mm, matte</i> | <i>KUG10M5508</i> | <i>5–6 m</i> |
| <i>Sphere, Ø 150 mm, matte</i> | <i>KUG15M5509</i> | <i>6–7 m</i> |

| <i>Egg, Ø 60 mm, polished</i> | <i>EIR06P5610</i> | <i>2–3 m</i> |
| <i>Egg, Ø 90 mm, polished</i> | <i>EIR09P5612</i> | <i>6–7 m</i> |
| <i>Egg, Ø 60 mm, matte</i> | <i>EIR06M5620</i> | <i>2–3 m</i> |
| <i>Egg, Ø 90 mm, matte</i> | <i>EIR09M5622</i> | <i>6–7 m</i> |

Shungite, a mineral from Karelia, has been used for centuries for water purification. It is valued for energetically enhancing water and is known in its homeland as a powerful “water stone.”

Shungite and Water

| There are two methods to make shungite water:

Direct: Place shungite stones directly in water and let them sit, allowing the water to absorb the stone’s energy and information.

Indirect: Place the shungite in a separate container (e.g., a test tube) or put the water container on a shungite plate to transmit the energy without direct contact.

Applications

Shungite water can be used for drinking, skin care, or for plants and animals.

Tips for Handling

Cleaning: For the direct method, clean the stones and container thoroughly every 2–3 months. Energetic cleansing is not necessary.

Containers: Use glass containers and avoid metal.

Storage: Keep the water in a shaded place and avoid direct sunlight.

In Water: A Comparison Between Classic and Elite Shungite

Elite Shungite

Elite Shungite is considered particularly intense and effective. For 1 liter of water, only 10 g of Elite Shungite is required to achieve optimal energetic structuring. The recommended exposure time is between 12 and 24 hours.

Elite Shungite Stones (approx. 5 to 15 pieces) with a total weight of 50 g, SKU: EDL05S1690

Shungite Water Set: Elite Shungite and Shungite Set Contents: 1 x 10 g Elite Shungite Stone and 6 x 10 g Classic (Normal) Shungite Stones, SKU: SET00SX198

Classic Shungite

Classic Shungite gently revitalizes water and improves its structure. Due to its natural dust, the stones should be thoroughly rinsed before use.

Ratio and Exposure Time

Use 100 g of Classic Shungite per 1 liter of water. Let the stones sit in the water for 24 to a maximum of 72 hours, then separate them and use the revitalized water.

On our website, you will find many other high-quality Elite Shungite stones, directly from the source, in various sizes and categories.

www.schungite.com

Shungite Gravel: Natural stones (10 - 20 mm), ideal for water purification, available in various packages.

300 g, SKU: SPL03E2228

1000 g, SKU: SPL10E2229

Individual, classic raw stones in various sizes (ideal for water preparation).

50 g, SKU: RST00E2475

500 g, SKU: RST05E2453

1000 g, SKU: RST10E2455

Shungite for Pets

Shungite Pendants for Animals

Shungite is valued for its strengthening energy, which animals perceive particularly well. Thanks to their natural connection to the environment, they are especially sensitive to energetic vibrations. A shungite pendant provides your pet with reliable support and requires no energetic cleansing.

Shungite Protection Stone "For My Darling", SKU: TIE25P0559

It offers protection against unwanted influences and is ideal for daily use – suitable for dogs and cats. Positive behavioral changes in your pet are often noticeable. More protective pendants for animals can be found on our website.

Shungite Water for Pets

Prepared the same way as for humans, using classic or elite shungite with identical exposure time and dosage.

Initially, we recommend offering two water sources to your pets, as they can detect subtle energetic differences and often prefer shungite water. Since there are no known side effects or risks of overdose, you may offer only shungite water after an observation period.

Shungite for Plants |

Shungite Water for Plant Growth

Shungite water can positively support the growth of your plants. Use it like regular watering water to give your plants an additional energetic boost. Comparisons often quickly show positive effects: plants watered with shungite water often grow more vigorously and produce more blossoms.

Shungite in the form of stones or powder is ideal for chemical-free plant care. The carbon in shungite can promote growth, increase resilience, retain moisture, and support nutrient absorption.

Shungite gravel: Mix it directly into the soil.

Indoor plants: 30–50 g per liter of soil.

Garden plants: 300 g per square meter.

Shungite powder: Mix well with the soil to prevent it from blowing away.

Indoor plants: 15–25 g per liter of soil.

Garden plants: 150 g per square meter.

Recommended Application Time

Indoor plants: Year-round.

Garden plants: In spring (February–March) to promote post-winter growth.

One application per year is sufficient, as shungite does not dissolve in the soil. Overdosing should be avoided to prevent soil acidification.

More than just stones

Our Service for You:

We offer not only the sale of Shungite stones, but also comprehensive service and quality:

- Expert advice on our products
- Guaranteed origin of our Shungite stones
- High quality, tested and certified
- Secure packaging and insured shipping of all parcels
- Fast exchange thanks to our extensive stock of Shungite and Elite Shungite products

Do you have questions? We're here for you!

Product advice: Assistance in selecting the right product

Shungite range: Information and consultation on our products

Shipping inquiries: Information on shipping options and delivery times

Please schedule an appointment in advance if you wish to visit us. Even though we sell Shungite online, you are welcome to visit us in person.
